

F*CK FLOKI Token

Big Black Paper

fckfloki.com

December 01, 2021

WTF is F*CK Floki?

F*CK Floki is a fun "Anti-Meme" charity token based on the SafeMoon liquidity and reflection protocols, which provides passive income, liquidity growth, and a 2% transactional tax that goes to animal welfare organizations.

F*CKFLOKI is a Binance Smart Chain-based cryptocurrency that offers the following features:

1. 5% Auto-Liquidity
2. 5% Reflection to Token Holders
3. 2% DEV transactional tax that goes to animal welfare organizations
4. 420,000,000,069 tokens in circulation
5. A witty "black paper" instead of a white paper
6. Renounced ownership
7. Fully audited in real-time by Market Move
8. Reachable on all social media outlets

This project was started by an anonymous UX Designer with the goal of generating a sarcastically amusing decentralized token to fight the false, imitation FLOKI token versions that offer no altruistic advantages. All the while, 100% of the Developer Tax is donated to animal welfare organizations like the ASPCA.

FCKFLOKI is presently accessible for PancakeSwap trading on the BNB Smart Chain, as well as an increasing number of exchanges. FCKFLOKI features a fun, yet informative "black paper" and "noob guide" available on the official website (www.fckfloki.com).

The token's primary goal is to provide investors with a laugh and peace of mind at a time when many crypto assets are experiencing "rug pulls" without delivering passive income or liquidity.

On November 28th, 2021, F*CK Floki debuted on the Binance Main-Net.

Tokenomics

Total Circulating Supply: 420,000,000,069 tokens

Ticker Symbol: FCKFLOKI

Contract Address: 0xA925be30F656eF92554Ac88DD6E2256E67E5D6bD

Blockchain: Binance Smart Chain (BEP-20)

Decimals: 9

Liquidity Protocols: 5% of transactions go to automatic liquidity

Reflection Protocols: 5% of transactions gets redistributed aka "reflected" to token holders

Charitable Deductions: 2% DEV tax goes to a third-party wallet, which is entirely donated to animal welfare organizations.

Renounced Ownership: Within days after the token's launch, ownership was renounced. This token is now 100% in the hands of our community.

Audit Results

Market Move conducts a real-time audit of the FCKFLOKI token. You can see the audit at any moment by entering our contract address on their website or following the link on our homepage.

Market Move Results as of December 2021

Roadmap

Phase 1: ALPHA

1. Design of a humorous website and logo
2. Token creation (without any prior experience)
3. Social media presence
4. BSC Scan Listing
5. Dedicated charity wallet
6. CoinMarketCap listing
7. CoinGecko listing
8. 5,000 token holders

Phase 2: DELTA

1. Marketing that is aggressive
2. Upset trolls on social media
3. Use influencers to our advantage
4. Make nonstop adverts and posts
5. Token promos
6. Try to figure out why we're failing
7. Link logo to digital wallets
8. 10,000 token holders

Phase 3: OMICRON

1. Notify Uranus of token price
2. Sell merch that is expensive
3. Obtain a listing on a centralized exchange
4. Stop paying Wix bill
5. On Twitter, get Elon Musk's brother to give us an "@fckloki"
6. Thousands of animals will be saved
7. Create the next charity F*CK _____ token
8. 42,069 token holders

Frequently Asked Dumb Questions

Why is this a “black paper” and not a white one? Once you go black, you never go back.

Is this token real? It’s as real as racism.

But I mean, is it “legit”? Just go to BSC Scan, the Market Move audit page, PancakeSwap, our social media accounts, and stop asking stupid questions after that.

Okay, but how safe is it? The Cryptosphere is not “safe”, but it has the potential to make you rich AF. This currency was inspired by Safemoon because we want it to travel beyond the moon all the way to URanus. To fulfill our promise of becoming the anti-meme, we set out to create a coin that provided stability, transparency, and community ownership.

What do you have against Floki? Elon Musk's snobbish, entitled avocado-eating dog is the actual Floki. Our beef is with the world of rip-off meme coins (like SHIB, KING SHIB, SHIBAVAX, FLOKI, LIL FLOKI, DOGE FLOKI, SANTA FLOKI, etc.) which are derivatives of derivatives and provide no altruistic value. They’re not even amusing.

How do I buy FCKFLOKI tokens? They’re available on PancakeSwap. **HINT:** There’s a step-by-step “noob guide” on our website.

How can I contact you? We prefer you didn’t.

I like avocados. You’re an elitist.

“This token will not make history.” – Elon Musk

Public Service Announcement: We can raise more money to rescue the lives of desperate, malnourished animals and eradicate animal cruelty in America by buying and selling this token than we could if we merely fund-raised the old-fashioned way.
